23. Problem: (use additional Sheets if necessary) Some obsolete versions of COTS product have been identified on the automount hosts at the NSIDC DAAC. These obsolete versions waste disk space on this server and in some cases have potential risk to utilize inappropriate versions of critical COTS software. In some cases these installations may be in violation of license agreements with COTS vendors, i.e., only a certain number of installations of any versions are permitted. COTS installed out of baseline also generate baseline audit discrepancies.						
24. Proposed Solution: (use additional sheets if necessary) To mitigate these issues, removal or upgrade of the automounted COTS as identified in the attached pages and ECO is requested. CM will update the baseline documents as identified.						
25. Alternate Solution: (use additional sheets if necessary) None
